EDUCATION

Master of Science in Computer Science Dept. of Computer Science, University of Delhi	2024-2026
Bachelor of Science in Computer Science Acharya Narendra Dev College, University of Delhi	2021-2024

TECHNICAL SKILLS

Languages: C, C++, Java, JavaScript, SQL

Technologies/Frameworks: ReactJS, NodeJs, Express, MongoDB, Git, GitHub

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Artificial Intelligence, OOPS, Computer Networks

PROJECTS

Digital Brain [↗](#) | ReactJs, Node.js, Express.js, MongoDB, JWT [Github](#)

- Engineered a comprehensive knowledge management platform enabling users to create, organize, and browse personal content collections through a clean, intuitive user interface.
- Developed a secure public-sharing system featuring unique access links with privacy controls, allowing users to share complete knowledge bases while maintaining visibility management
- Implemented robust authentication using JWT sessions, HTTP-only cookies, and middleware protection for secure user accounts and personalized content access control.

Klimate [↗](#) | React, TypeScript, TanStack Query [Github](#)

- Built Klimate, a weather application using React, TypeScript, TanStack Query, and Tailwind CSS, integrating the browser Geolocation API to automatically detect user location and fetch real-time weather data with high reliability and responsiveness.
- Implemented an optimized data-fetching, caching, and state-management system with TanStack Query, enabling background updates, reduced API overhead, and faster load times, resulting in a smoother and more efficient end-user experience across all devices.

AI-Powered UI Component Generator [↗](#) | React, Vite, Tailwind CSS, JavaScript [Github](#)

- Engineered a full-stack React application integrating Gemini API to automatically convert natural language descriptions into functional, responsive HTML/CSS/JS code components with modern styling and animations.
- Implemented a comprehensive developer workspace featuring an integrated Monaco code editor for advanced real-time code visualization and a synchronized live-preview iFrame, creating a seamless development .
- Streamlined the frontend component development workflow by implementing robust one-click code export functionality and instant clipboard copying features, significantly reducing manual coding efforts.

INTERNSHIP

EKTROS [↗](#) 05 2025 – 07 2025
Frontend Developer Intern Delhi, India

- Built scalable web interfaces using React.js and Tailwind CSS, focused on performance and responsive design
- Adhered to modern frontend development best practices, emphasizing modular component reusability, mobile-first responsive design, and version control using Git for collaborative code management.

AWARDS/ACTIVITIES

- Solved Over 400+ DSA Questions on Different Coding Platforms.**
- HackArena 2025 - 2nd Position:** Designed and developed a mobile plant identification app using Reactjs, integrating PlantId API for image classification.
- INVEST2PROTECT 2025-3rd Position:** Proposed a cost-effective cybersecurity solution within a defined budget during a strategic problem-solving competition.
